

**GENERAL**

This is a general summary of PUD policy for primary distribution line extension and service installation charges. Please call Engineering for specific charges for your project.

The cost of line extensions or revisions is borne by the customer. Charges for the primary and secondary cable systems are based on the estimated cost of the installation. Included are costs for labor, transportation, material, overheads and other customary construction costs. If installation is for temporary use, the customer pays the estimated cost of line installation and removal. Payment of all fees is required before PUD construction crews are scheduled.

**UNDERGROUND LINE EXTENSION FOR MAJOR PROJECT OR PLAT**

Customer typically furnishes trenching, conduit, backfill, vaults and in some cases, service lateral conductor and/or conduit.

**SERVICE INSTALLATION FEES-OWNERSHIP-EXCESS FOOTAGE CHARGES**
