FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2023 AND 2022 **PUBLIC UTILITY DISTRICT #1 OF FRANKLIN COUNTY** 1411 W. Clark Street | Pasco, WA 99301 (509) 547-5591 or (800) 638-7701 FRANKLIN www.franklinpud.com

GENERAL MANAGER / CHIEF EXECUTIVE OFFICER

MESSAGE TO OUR CUSTOMERS

The financial performance presented in this document is a direct reflection of the hard work of Franklin PUD employees. In 2023, due to their dedication to fulfill our mission and keep rates as low and stable as possible, Franklin PUD successfully completed the smart meter deployment and began constructing a new substation without implementing any rate action for our customers.

The actions of our Board of Commissioners, myself, and staff are driven by four simple Guiding Principles: ensure safety is first in all we do, maintain low and stable rates, sustain high systems reliability, and continue to develop strong and supportive relationships with our customers and community partners.

We were able to navigate the increasing pressures from legislative mandates, supply chain issues, extraordinary inflationary costs in materials and supplies and the continued load growth in our service territory. All this in addition to the lingering aftermath of the 2020 pandemic experienced a few years ago. Through creative thinking and our drive to continuously be better, 2023 marked six years without any rate action for our customers. We recognize that our customers put a tremendous amount of trust in us to continue to provide highly reliable electric service and do everything we can to keep electric service rates as low and stable as possible without compromising the integrity and reliability of our electric system, and the level of service we provide.

As with every year, we will reflect on the accomplishments we had and where we may have fallen short. We will look for ways we can be better. We know that every action taken has an impact to the customers we serve and will continue to be innovative problem solvers.

INDEPENDENT AUDITOR'S REPORT

Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Public Utility District No. 1 of Franklin County January 1, 2022 through December 31, 2023

Board of Commissioners Public Utility District No. 1 of Franklin County Pasco, Washington

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of Public Utility District No. 1 of Franklin County, as of and for the years ended December 31, 2023 and 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, and have issued our report thereon dated July 3, 2024.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

In planning and performing our audits of the financial statements, we considered the District's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the District's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described above and was not designed to identify all deficiencies in internal control that might be material weaknesses or

significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified.

Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses.

REPORT ON COMPLIANCE AND OTHER MATTERS

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

PURPOSE OF THIS REPORT

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose. However, this report is a matter of public record and its distribution is not limited. It also serves to disseminate information to the public as a reporting tool to help citizens assess government operations.

INDEPENDENT AUDITOR'S REPORT

Report on the Audit of the Financial Statements

Public Utility District No. 1 of Franklin County January 1, 2022 through December 31, 2023

Board of Commissioners Public Utility District No. 1 of Franklin County Pasco, Washington

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinions

We have audited the accompanying financial statements of Public Utility District No. 1 of Franklin County, as of and for the years ended December 31, 2023 and 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the financial section of our report.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of Public Utility District No. 1 of Franklin County, as of December 31, 2023 and 2022, and the changes in financial position and cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and

fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

Performing an audit in accordance with GAAS and *Government Auditing Standards* includes the following responsibilities:

- Exercise professional judgment and maintain professional skepticism throughout the audit;
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements;
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the District's internal control. Accordingly, no such
 opinion is expressed;
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements;
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time; and
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information listed in the financial section of our report be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARDS

In accordance with *Government Auditing Standards*, we have also issued our report dated July 3, 2024 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Management's Discussion & Analysis

Public Utility District No. 1 of Franklin County (District) provides the following overview and analysis of key data presented in the District's basic financial statements for the years ended December 31, 2023 and 2022, with additional comparative data for 2021. Information within this section should be used in conjunction with the basic financial statements and accompanying notes.

OVERVIEW OF THE FINANCIAL STATEMENTS

The District accounts for its financial activities within a single proprietary fund. The District's financial activities are comprised of the purchase, transmission, distribution, and sale of electric energy, as well as the sale of wholesale telecommunication services.

In accordance with requirements set forth by the Governmental Accounting Standards Board (GASB), the District's financial statements employ the accrual basis of accounting in recognizing increases and decreases in economic resources. Accrual accounting recognizes all revenues when earned and expenses when incurred during the year, regardless of when cash is received or paid.

The basic financial statements for the years ended December 31, 2023 and 2022 are comprised of:

Statement of Net Position: The District presents its Statement of Net Position using the balance sheet format. The statement reflects the assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position (equity) of the District at year-end. The net position section of the statement is separated into four categories: net investment in capital assets, restricted for debt service, restricted for pension and unrestricted.

Statement of Revenues, Expenses, and Changes in Net Position: This statement reflects the transactions and events that have increased or decreased the District's total economic resources during the period. Revenues are presented net of allowances and are summarized by major source. Revenues and expenses are classified as operating or non-operating based on the nature of the transaction.

Statement of Cash Flows: The Statement of Cash Flows reflects the sources and uses of cash separated into four categories of activities: operating, noncapital financing, capital and related financing, and investing. The District classifies highly liquid investments within its definition of cash and cash equivalents

The notes to the financial statements presented at the end of the basic financial statements are considered an integral part of the District's presentation of financial position, results of operations, and changes in cash flows.

FINANCIAL ANALYSIS

The District ended 2023 with an increase in Net Position of 6.66%; continuing the strong financial performance of 2022.

The following financial analysis focuses on the results of the District's operations by major components of income and expense for all periods presented.

2022 to 2023:

Retail energy sales comprised approximately 80% of the District's Operating Revenues in 2023. A decrease of 1% from 2022 was driven primarily by a return to average loads after those driven by the extreme cold in December 2022. Total sales of kilowatt hours delivered to customers decreased 1.14% from 2022.

Secondary Market Sales includes revenues derived from the resale of district power supply and related attributes and credits. This revenue stream increased 21.3% in 2023 due to several factors. Overall average wholesale power pricing increased in 2023 over 2022, and milder weather left the District in a surplus power position for several months in 2023. This

resulted in the sale of approximately 34,000 additional megawatt hours on the open market over 2022.

The addition of monthly firm power provided by the District's Power Supply contract with Powerex, a wholly-owned subsidiary of BC Hydro, contributed to this. Additionally, the Districted received of \$1.89m in proceeds from the sale of no-cost carbon allowances as part of Washington's first quarterly carbon allowance auction in September 2023.

2021 to 2022:

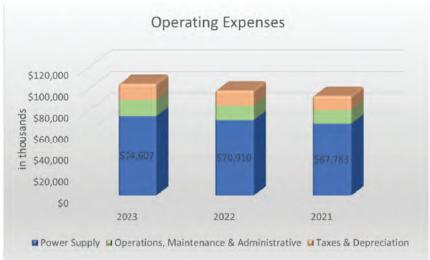

Retail energy sales comprised approximately 83% of the District's Operating Revenues in 2022. An increase of 3.17% over 2021 was driven primarily by an increase in kilowatt hour (kWh) loads experienced in December 2022 with extremely cold temperatures

Increased annual sales to Residential customers due to the cold December weather were offset by decreased Irrigation sales during the summer of 2022. Consumption of kWh by Irrigation customers in 2022 fell by 33.6% as operating conditions returned to average after record 2021 summer heat.

Secondary Market Sales increased 6.90% in 2022 due to strong pricing in the wholesale power market.

Operating Expenses

The following chart is graphical representation of the District's previous three years Operating Expenses:

Power Supply Costs represent the cost of providing electricity to the District's customer base. Power Supply Costs comprised approximately 71.2% of the District's total operating expenses in 2023. These costs can be heavily impacted by price movement in the wholesale power market. The market reacts to changes in water year forecasts, extreme weather events, and other external factors. Net Power Supply is Power Supply less revenue received from the sale of electricity on the secondary market (Sales for Resale). The following graph illustrates the components of the District's Power Supply Costs on a net basis.

Net Power Costs (in thousands)

2022 to 2023:

Gross Power Supply costs rose 5.21% in 2023 resulting primarily from an increase in market pricing over 2022, which impacts certain resources the District uses to supplement supply provided by Bonneville Power Administration. Additionally, 2023 marked the first full year of the District's Power Supply Contract with Powerex. The contract provides firm supply to supplement the District's other power resources and can be used to serve the District's retail load or sold on the open market. For further information on the Powerex contract, refer to Note 9 to the financial statements – Power Supply.

2021 to 2022:

Gross Power Supply costs rose 4.61% in 2022 resulting from strong pricing in the wholesale market. The District's contract with Frederickson Power ended on September 1, 2022 after which the District filled deficit power resources with purchases on the wholesale market, particularly during the extreme cold experienced at the end of 2022. Total purchases on the wholesale market exceeded 2021 by \$9.0 million; however, this was offset by \$4.4 million in savings related to the expiration of the Frederickson Power contract.

Capital Contributions

2022 to 2023:

Total revenue from Capital Contributions decreased 34.69% in 2023. The District experienced an increase in service orders for new electric service, causing an increase to Capital Contribution fees. However, this was offset by a decrease in recognized construction related revenue of 56.88% as the District did not complete large commercial projects on the scale of those completed and recognized in 2022.

2021 to 2022:

Revenue resulting from Capital Contributions increased 155.37% in 2022 due to the completion of two major commercial projects. Infrastructure to support two automated warehouses in the District's service territory was installed and are expected to add 14 MW of peak electric load when fully operational. Another large-scale project for a new food processing facility was also completed. These two projects accounted for over 50% of the Capital Contributions revenue recognized in 2022.

SUMMARY OF FINANCIAL POSITION

2021 to 2022:

The District's overall financial position improved in 2023, with an increase in Net Position of approximately \$10.4 million. The District's Unrestricted Cash Reserves held steady by the advance receipt of customer funds contributing to the construction of a new substation, which commenced active construction in the fall of 2023. Also contributing to the maintenance of unrestricted reserves was the Reserve Distribution Credit (RDC) received from the Bonneville Power Administration from December 2022 through September 2023 as credit on the District's monthly Power Bills. The District continues to monitor the current economic environment and is experiencing the impact of continued inflation. These factors, along with projected cash balances and future capital needs, are the basis for determining whether future rate action is necessary. The District's last rate increase was 4.1%, effective May 1, 2017.

District management monitors the effectiveness of its financial operations by measuring results against the financial policy adopted by the District's governing body. This policy directs District management to develop financial plans that position the District for current and future years while being fiscally responsible to the District's ratepayers. The financial policy consists of three key financial performance metrics – minimum cash/investment reserve balance (sufficient to fund 20% of gross power supply costs, 15% of other operating costs, and 20% of the annual amount of planned capital spending over the next 5 years); minimum debt service coverage ratio of 1.8; maximum debt/asset ratio of 40%; and funding of a Rate Stabilization Fund at a level sufficient to meet the fiscal needs of the District. The District achieved all financial performance metrics for 2023, 2022 and 2021.

Capital Asset and Long-Term Debt Activity

Capital Assets (in thousands)

	2023	2022	Increase (Decrease)	% Change	2021
Land	\$1,242	\$892	\$350	39.24%	\$892
Plant in Service	290,247	276,932	13,315	4.81%	265,767
Construction Work lin Progress	7,572	992	6,580	663.31%	1,208
Accumulated Depreciation	(132,236)	(124,732)	(7,504)	6.02%	(122,473)
Total Net Capital Assests	\$166,825	\$154,084	\$12,741	8.27%	\$145,394

The District's Net Capital Assets increased 8.27% in 2023. Major items contributing to the increase was the completion of Phase 2 of improvements to the Franklin Substation, replacements to the District's fleet assets, and underground infrastructure provided by developers to serve new customers.

In 2023, Construction began on a major substation project that will serve a food production facility as well as position the District for future growth, driving the increase in Construction Work in Progress. This project is expected to be completed in 2024 and associated capital contribution revenue recognized for the share of the project funded by the customer.

More detailed information about the District's capital assets is presented in Note 3 to the financial statements - Capital Assets.

Long Term Debt (in thousands)

	2023	2022	Increase (Decrease)	% Change	2021
Revenue Bonds, including Current Position	\$61,809	\$64,858	(\$3,049)	-4.07%	\$67,104

Debt service payments totaled \$4.8 million in 2023 and \$4.1 million annually in 2022 and 2021. More detailed information regarding the District's long term debt is presented in Note 5 to the financial statements - Long Term Debt.

Bond Ratings

In 2023, the District affirmed its credit rating with Standard & Poor's (A+). The District affirmed its credit rating with Moody's in 2020 (A1), and there was no change to this rating in 2023 or 2022.

OTHER SIGNIFICANT MATTERS

The District issued the Series 2024 Electric Revenue Bonds on March 25, 2024 in the amount of \$18,640,000.

In February 2024, Moody's investor services upgraded the District's bond rating from A1 to Aa3.

The District's Board of Commissioners at its April 23, 2024 regular meeting approved an overall increase to electric rate revenue of 3% effective annually from May 1, 2024 - May 1, 2027

(Increase) Decrease in Receivables	703,261	(1,407,181)
(Increase) Decrease in Plant Supplies	(3,995,127)	(1,120,456)
(Increase) Decrease in Prepaid Expenses	60,659	(92,827)
(Increase) Decrease in Other Assets	5,580	(32,211)
(Decrease) Increase in Payables	2,519,120	2,907,455
(Decrease) Increase in Other Credits	5,052,630	(261,712)
NET CASH PROVIDED BY OPERATING ACTIVITIES	\$13,215,731	\$16,198,696

NONCASH INVESTING, CAPITAL AND FINANCING ACTIVITIES

During 2023 and 2022, the District received \$876,919 and \$901,314, respectively, in non-cash capital contributions.

Accumulated increases and decreases in the fair value of hedging derivatives had no effect on cash fl^{lows for} 2023 or 2022. For accumulated increases in fair value, the District records an offsetting asset.

For accumulated decreases in fair value, the District records an offsetting liability.

Public Utility District No. 1 of Franklin County Notes to the Financial Statements

December 31, 2023 and 2022

NOTES TO THE FINANCIAL STATEMENTS

For the Years Ended December 31, 2023, and 2022

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Public Utility District No. 1 of Franklin County (the District) was established in 1938 and purchases, transmits, distributes, and sells electric energy. In addition, the District is authorized under state law to provide wholesale telecommunications services. The District's service area is approximately 435 square miles in Franklin County, and includes over 90 percent of the County's population. The District's properties include 21 substations, 1,821 miles of transmission and distribution lines, and other buildings, equipment, and related facilities. The District has 84 employees and serves 33,715 active accounts. The District has operating revenues in excess of \$109 million and total assets of over \$257 million. An elected three-member Board of Commissioners administers the District.

As required by generally accepted accounting principles (GAAP), the District has considered all potential component units in defining the reporting entity and has identified no component units.

BASIS OF ACCOUNTING AND PRESENTATION

The accounting and reporting policies of the District are regulated by the Washington State Auditor's Office under chapter 43.09 RCW and are based on the Uniform System of Accounts prescribed for public utilities and licensees by the Federal Energy Regulatory Commission (FERC). The District uses the full accrual basis of accounting where revenues are recognized when earned and expenses are recognized when incurred. Revenues and expenses related to the District's principal operations are considered to be operating revenues and expenses; while revenues and expenses related to capital, financing, and investing activities are considered to be non-operating revenues and expenses.

The District's accounting policies conform to GAAP as applicable to governmental entities. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The following are a summary of the significant accounting policies used in the preparation of the financial statements.

DEPOSITS AND INVESTMENTS

For purposes of the Statement of Cash Flows, short-term highly liquid investments with a maturity of less than three months at the time of purchase are considered cash equivalents. Cash equivalents classified as noncurrent are not included in the Statement of Cash Flows due to their intended purpose. The District reports investments at fair value.

The District considers all deposits with the Washington State Treasurer's Local Government Investment Pool (LGIP) cash and cash equivalents. Since the pool is sufficiently liquid to permit withdraw of cash at any time without prior notice or penalty, equity in the pool is also deemed to be a cash equivalent

Funds in the Local Government Investment Pool (LGIP), a qualified, unrated external investment pool, are reported at amortized cost which approximates fair value. The pool portfolio is invested in a manner that meets the maturity, quality, diversification and liquidity requirements set forth by the GASB Statement No. 79 – Certain External Investment Pools and Pool Participants for external investment pools that elect to measure, for financial reporting purposes, investments at amortized cost. Refer to Note 2 – Deposits and Investments.

RESTRICTED ASSETS

Deposits and investments are recorded in accounts as prescribed by the District's bond resolutions or third-party contractual agreements. The funds held in these accounts are restricted for specific uses including debt service and are classified under both current and non-current assets based on the nature and intent of the funds use.

ACCOUNTS RECEIVABLE

The District uses the percentage-of-sales method to record amounts estimated to be uncollectible based on the prior year's write offs. Uncollected accounts over 60 days, except those with special arrangements, are approved monthly for write off by the Board of Commissioners.

INVENTORIES

Inventories are valued at average cost, which approximates the fair value.

DERIVATIVE INSTRUMENTS

The District accounts for derivative instrument transactions in accordance with GASB Statement No. 53 Accounting and Financial Reporting for Derivative Instruments. Subject to certain exceptions, GASB 53 requires that every derivative instrument be recorded on the statement of net position as an asset or liability, measured at its fair value and that changes in the derivatives fair value be recognized currently in earnings unless such derivatives meet specific hedge accounting criteria to be determined as effective. Effective hedges qualify for hedge accounting and such changes in fair values are deferred. It is the District's policy to document and apply as appropriate the normal purchase and normal sales exception under GASB Statement No. 53. The District has reviewed its various contractual arrangements to determine applicability of these standards. Purchases and sales of forward electricity, natural gas and option contracts that require physical delivery and which are expected to be used or sold by the reporting entity in the normal course of business are generally considered "normal purchases and normal sales". These transactions are excluded under GASB Statement No. 53 and therefore are not required to be recorded at fair value in the financial statements. Certain put and call options, and financial swaps for electricity and natural gas, are considered to be derivatives under GASB Statement No. 53, but do not generally meet the "normal purchases and normal sales" criteria.

As of December 31, 2023, the District had the following derivative instruments outstanding:

	Changes in I	Fair Value	Fair Val December :			
	Classification	Amount	Classification	Amount	Notional	
Cash Flow Hedges:						
Financial Swap Forward	Deferred Inflow	\$ (2,627,059)	Derivative Asset	\$ 2,627,059	221,960 1	MWH
Financial Swap Forward	Deferred Outflow	\$ 2,657,454	Derivative Liability	\$ (2,657,454)	164,640	MWh

These derivative instruments were entered into between October 2022 and December 2023 with maturities between January 2024 and September 2026.

As of December 31, 2022, the District had the following derivative instruments outstanding:

	Changes in	Fair Value	Fair Val December 3		
	Classification	Amount	Classification	Amount	Notional
Cash Flow Hedges:					
Financial Swap Forward	Deferred Inflow	\$ (5,299,001)	Derivative Asset	\$ 5,299,001	107,320 MWh
Financial Swap Forward	Deferred Outflow	\$ 55.952	Derivative Liability	\$ (55,952)	13.080 MWh

These derivative instruments were entered into between October 2020 and November 2022 with maturities between January 2023 and June 2025.

The fair values of the commodity swap contracts are based on the futures price curve for the Mid-Columbia Intercontinental Exchange for electricity. This reduction of basis risk is achieved through the use of financial basis swaps. The fair value of the options was calculated using the Black-76 options pricing model. The District categorizes its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. All of the District's fair value measurements are classified as Level 2.

OBJECTIVE AND STRATEGIES

The District enters into derivative energy transactions to hedge its known or expected positions within its approved risk management policy. Decisions are made to enter into forward transactions to protect its financial position, specifically to deal with expected long and short positions as determined by projected load and resource balance positions. Generally, several strategies are employed to hedge the District's resource portfolio, including:

Combustion Turbines

The District's contract for this resource ended as of September 1, 2022. Until that point, the District purchased gas for future periods to generate electricity when the plant was economically viable on a marginal basis for that period based on parameters set by the Risk Management Committee. If load projections indicated that the District did not require the electricity to serve its customers, an equivalent quantity of power will concurrently be sold or otherwise hedged for the same period.

Surplus Purchased Power Resources

The District hedges projected surpluses in future periods by selling power or by purchasing put options. Surplus power is generally sold forward at a fixed-price, either physically or financially, when the probability of surplus is very high; surplus power is hedged through the purchase of physical or financial put options when the projected surplus is less certain, but nevertheless expected to be available under expected scenarios.

Deficit Power Resources

The District hedges projected power resource deficits in future periods by purchasing power or by purchasing power call options (or if the Frederickson Project (see Note 9 - Power Supply) was economically viable for the period, by buying gas or gas call options). Power is generally purchased to cover projected deficits at a fixed price, either physically or financially, when the probability of the deficit position is very high; such deficit positions are hedged through the purchase of physical or financial call options when the projected deficits are less certain, but nevertheless expected under the approved planning conditions.

Derivatives authorized under the Risk Management Policy and employed by the District include:

- Physical power and natural gas forward purchases and sales
- Monthly and daily power and gas physical calls and puts
- Power and natural gas fixed for floating swaps
- Currency swaps relating to managing US/Canadian exchange rate risk resulting
- · from transactions denominated in Canadian dollars
- · Quarterly and monthly financial power and gas put and call options
- Financial daily power and gas put and call options
- · Quarterly and monthly financial power and natural gas swaptions
- Financial natural gas swing and basis swaps

There is no associated debt for these instruments at December 31, 2023 or 2022.

Credit Risk

The District's Risk Management Committee (RMC) partners with The Energy Authority (TEA) to develop credit policies and credit limits for the counterparties with whom the District conducts physical and financial commodity transactions. Services performed by TEA include monitoring of credit exposure on a real time basis on behalf of the District, as well as providing recommendations regarding counterparty credit quality based on various credit evaluation factors.

All physical electricity transactions (for hourly and/or daily) for the District are traded by TEA as principal (on behalf of the District) and rely on TEA's credit limits. All forward physical/financial commodity transactions are entered into only with counterparties approved by the District's Risk Management Committee for creditworthiness; credit limits based on market conditions and available qualified counterparties are established and reviewed annually by the Risk Management Committee.

As of December 31, 2023 and 2022, the District had 47 and 45 counterparties, respectively, available for conducting transactions. The maximum credit extended to any single counterparty in either year was \$3 million. The District entered into master enabling agreements with various counterparties, which enable hedging transactions. Such agreements include the Western Systems Power Pool (WSPP) form of agreement for physical power transactions, various forms of enabling agreements for physical gas transactions and International Swap Dealers Association Agreements (ISDA) for financial transactions. All of the enabling agreements have provisions addressing credit exposure and provide for various remedies to assure financial performance, including the ability to call on additional collateral as conditions warrant, generally as determined by the exposed party. The District also uses netting provisions in the agreement to diffuse a portion of the risk.

Transactions under the physical enabling agreements are used to deal with long and short physical positions under the direction of the Risk Management Committee and pursuant to the risk management policy. Transactions under the ISDA agreements are used to financially hedge long or short positions so that the agreements also permit the District to hedge the risk of an underlying physical position by using call options, or put options.

The aggregate fair value of hedging derivative instruments in asset positions was \$2,627,059 and \$5,299,001 as of December 31, 2023 and 2022, respectively. The District transacts with various counterparties throughout the year, and as of December 31, 2023 three counterparties comprised 100% of the net exposure to credit risk, with credit ratings ranging from Not Rated/A- Stable to A/Stable. As of December 31, 2022 five counterparties comprised 100% of the net exposure to credit risk, with credit ratings ranging from Not Rated/Baa3 Negative to A+/Stable.

Basis Risk

The District proactively works to eliminate or minimize basis risk on energy transactions by entering into derivative transactions that settle pursuant to an index derived from market transactions at the point physical delivery is expected to take place. At December 31, 2023 and 2022, there are no derivative transactions outstanding that carry basis risk. As applicable, all power related transactions are to be settled on the relevant Mid-Columbia index. The District has ready access to electric transmission at those respective trading points

Termination Risk

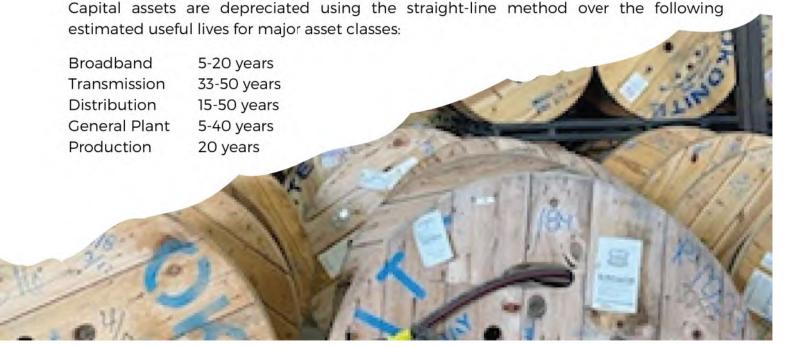

As of December 31, 2023 and 2022, no termination events have occurred and there are no outstanding transactions with material termination risk. None of the outstanding transactions have early termination provisions except in the event of default by either counterparty. Events of default are generally related to (i) failure to make payments when due, (ii) failure to provide and maintain suitable credit assurances as required, (iii) bankruptcy or other evidence of insolvency, or (iv) failure to perform under any material provision of the agreement. Failure to provide or receive energy or natural gas under physical commodity transactions does generally not fall under the events of default provisions, unless the non-performing party fails to pay the resulting liquidated damages as they come due.

There is no rollover, interest rate, foreign currency, or market access risk for these derivative products as of December 31, 2023 and 2022.

UTILITY PLANT AND DEPRECIATION

Major expenses for utility plant and major repairs that increase useful lives are capitalized. The District's capitalization threshold is \$5,000 for non-infrastructure capital. All costs related to infrastructure are capitalized. Maintenance, repairs and minor renewals are accounted for as expenses when incurred.

Utility plant in service and other capital assets are recorded at cost where the historical cost is known. Where historical cost is not known, assets are recorded at estimated cost. Contributions by developers and customers are recorded at estimated value as contributions in aid of construction. The District records depreciation on assets acquired by contributions.

Intangible assets are amortized over their estimated useful life at the time of purchase, if the asset meets the criteria for amortization. Initial depreciation on utility plant is generally recorded in the month subsequent to project completion.

Preliminary costs incurred for proposed projects are deferred pending construction of the facility. Costs relating to projects ultimately constructed are transferred to utility plant. Charges that relate to abandoned projects are expensed.

The estimated original cost of operating property retired (or otherwise disposed of) and the cost of removal, less salvage, is charged to accumulated depreciation. For distribution and certain Broadband assets, the retirement original cost is calculated using the average cost of the asset and is charged to accumulated depreciation, while the cost of removal remains in a separate retirement costs subaccount. In the case of the sale of a significant operating unit or system, the original cost is removed from the utility plant accounts, accumulated depreciation is charged with the accumulated depreciation related to the property sold, and the net gain or loss on disposition is credited or charged to income. There were no sales of significant units or systems in 2022 or 2023.

OTHER CREDITS AND LIABILITIES

The District records unpaid leave for compensated absences as an expense and liability when incurred. Personal leave may accumulate to a maximum of 700 hours, and is payable upon separation of service, retirement, or death. Employees hired before April 1, 2011 may accumulate a maximum of 1,200 hours.

Extended sick leave is sick leave accrued by employees (at 30%) prior to April 1, 1993, adjusted to actual as of December 31, 2023 and 2022. This total is no longer current sick leave; it is used at the employee's option to supplement the District sponsored short-term disability plan. The amount also represents the portion of leave that may be used upon retirement towards health insurance.

The District records revenues collected from Contributions in Aid of Construction at the beginning of a capital project as unearned revenue (Customer Advances for Construction) until the capital project is completed, at which point the revenue is recognized as revenue from Capital Contributions on the Statement of Revenues, Expenses and Changes in Net Position. The unrecognized portion (Customer Advances for Construction) of Capital Contributions is presented under Current Liabilities as Other Credits and Liabilities on the Statement of Net Position. Refer to Note 6 - Other Credits and Liabilities.

DEBT PREMIUM AND DISCOUNT

Original issue and reacquired bond premiums and discounts relating to revenue bonds are amortized over the lives of the related bonds using the straight-line method. Unamortized premium and discount is included in the amount shown as Outstanding Revenue Bonds within the financial statements. Debt issuance costs are expensed in the period incurred in accordance with GASB Statement No. 65.

REVENUE RECOGNITION

Revenues from retail sales of electricity include an estimate for energy delivered to customers between the last billing date and the end of the year. This amount is included within Retail Energy Sales in the accompanying financial statements in the amount of \$3.4 million at December 31, 2023 and \$3.1 million at December 31, 2022.

PENSIONS

For purposes of measuring the net pension asset and net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of all state sponsored pension plans and additions to/deductions from those plans' fiduciary net position have been determined on the same basis as they are reported by the Washington State Department of Retirement Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms.

FEDERAL AND STATE GRANT REVENUE

The District was awarded grant funding in 2023 and 2022. Portions of the funding were eligible for matching funds from the State of Washington. Funds were provided as a cash advance or on a cost reimbursement basis depending on the terms of the grant agreement for the specific program. These funds are included within the amount presented on the Statement of Revenues, Expenses and Changes in Net Position. Refer to Note 15 – Grant Awards.

USE OF ESTIMATES

The preparation of the financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

CONSTRUCTION FINANCING

Capital expenditures in 2023 were made using 14.31% from capital contributions, 80.31% from rate revenue and 5.38% from bond funds.

Total Funds	\$59,053,032	\$61,286,920

CREDIT RISK

In accordance with the District's bond resolutions and investment policy all investments are held in instruments permitted for funds of the District under the Revised Code of Washington.

The District's cash deposits are covered by the Federal Deposit Insurance Corporation (FDIC) or protected against loss by deposit with financial institutions recognized as qualified public depositories of the state of Washington under the guidelines of the Washington State Public Deposit Protection Commission (PDPC).

As of December 31, 2023, District investments had the following credit quality and risk exposure:

Туре	Fair Value	Average Maturity	Held By	S&P/Moody's Rating
Agencies	\$7,699,579	1-2 years	US Bank	AA+/Aaa
Treasuries	\$16,587,777	2-3 years	US Bank	NR/Aaa

As of December 31, 2022, District investments had the following credit quality and risk exposure:

Туре	Fair Value	Average Maturity	Held By	S&P/Moody's Rating
Agencies	\$7,518,844	2-3 years	US Bank	AA+/Aaa
Treasuries	\$2,508,493	<1 year	US Bank	NR/Aaa

CUSTODIAL CREDIT RISK

The District's deposits and investments are held by public depositories authorized by the Washington Public Deposit Protection Commission (PDPC). Public depositories are required to fully collateralize deposits in accordance with state law, and as such are not subject to custodial credit risk.

FAIR VALUE

The District measures and reports investments at fair value using the valuation input hierarchy established by generally accepted accounting principles, as follows:

- Level 1: Quoted prices in active markets for identical assets or liabilities;
- Level 2: These are quoted market prices for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other than quoted prices that are not observable;
- Level 3: Unobservable inputs for an asset or liability.

As of December 31, 2023, the District had the following investments measured at fair value:

		Fai	r Value Measurements U	sing
Туре	Fair	Level	Level 2	Level 3
Agencies	\$7,699,579		\$7,699,579	
Treasuries	16,587,777	16,587,777		
Total Investments	24,287,356	16,587,777	\$7,699,579	

As of December 31, 2022, the District had the following investments measured at fair value:

		Fai	r Value Measurements Us	sing
Туре	Fair	Level	Level 2	Level 3
Agencies	\$7,518,844		\$7,518,844	
Treasuries	\$2,508,493	2,508,493		
Total Investments	\$10,027,337	2,508,493	\$7,518,844	

FUNDS HELD IN THE LOCAL GOVERNMENT INVESTMENT POOL (LGIP)

The District transfers funds between cash accounts and the Local Government Investment Pool (LGIP) in order to meet the District's operational needs. The LGIP is an external investment pool operated by the Washington State Treasurer. The pool is not rated and not registered with the SEC. Rather, oversight is provided by the State Finance Committee in accordance with RCW 43.250. Investments in the LGIP are reported at amortized cost, which is the same as the value of the pool per share. The LGIP does not impose any restrictions on participant withdrawals.

The Office of the State Treasurer prepares a stand-alone financial report for the pool. A copy of the report is available from the Office of the State Treasurer, PO Box 40200, Olympia, Washington 98504-0200, online at www.tre.wa.gov.

BOND PRINCIPAL AND INTEREST

The District's bond resolutions require deposit of District Revenues sufficient to pay accrued semi-annual interest and annual principal as due within the coming year. These funds are restricted by the bond resolutions strictly for payment of debt service obligations.

DEBT SERVICE RESERVE

In accordance with the District's bond resolution, the District provides a reserve account for the payment of principal and interest on the bonds. The reserve account does not secure the bonds. The District recalculates the balance required of the reserve account in accordance with the bond resolutions annually and releases an amount to bring the fund to the level required. The Debt Service Reserve fund is held in liquid Cash Equivalents; however, the District has classified it as noncurrent as the intent is not to use the fund for current debt service coming due.

ESCROW ACCOUNT

The District maintains a separate escrow account to secure a \$10,000 blanket bond held with the Washington State Department of Transportation (WSDOT). The funds in this account are held in a separate escrow savings bank account for benefit of WSDOT and covers all projects the District performs on behalf of WSDOT.

NOTE 3 - CAPITAL ASSETS

Utility Plant Activity for the year ended December 31, 2023 was as follows:

Utility Plant	Balance,	Increase	Decrease	Balance,
	12/31/2022			12/31/2023
Assets not subject to depreciation:				
Land	\$892,140	\$350,215		\$1,242,355

Distribution	(88,034,867)	(6,429,692)	656,622	(93,807,937)
General Plant	(16,422,910)	(700,696)	278,028	(16,845,578)
Total Accumulated Depreciation and Amortization	(124,731,772)	(8,601,774)	1,096,967	(132,236,579)
Net Utility Plant	\$154,083,889	\$40,223,839	(\$27,482,621)	\$166,825,107

Utility Plant Activity for the year ended December 31, 2022 was as follows:

Utility Plant - As Restated*	Balance, 12/31/2021	Increase	Decrease	Balance, 12/31/2022
Assets not subject to de preciation:				
Land	\$892,140			\$892,140
Construction Work in Progress	1,208,172	23,833,044	(24,049,423)	991,793
Assets subject to depreciation or amortization:				
Intangible	823,099		(192,052)	631,047
Broad band	23,656,784	8,707,838	(7,321,975)	25,042,647
Transmission	8,075,615	91,095	(166,043)	8,000,667
Distribution	208, 235, 147	15,292,597	(5,808,769)	217,718,975
General Plant	24,976,240	726,939	(164,787)	25,538,392
Sub to ta I	267,867,197	48,651,513	(37,703,049)	278,815,661
Less Accumulated Depreciation and Amortization:				
Intangible	(548,973)	(108,521)	189,469	(468,025)
Broadband	(14,989,957)	(919,604)	53,923	(15,855,638)
Transmission	(3,763,079)	(189,713)	2,460	(3,950,332)
Distribution	(87,225,457)	(4,264,990)	3,455,580	(88,034,867)
General Plant	(15,946,019)	(641,678)	164,787	(16,422,910)
Total Accumulated Depreciation and Amortization	(122,473,485)	(6,124,506)	3,866,219	(124,731,772)
Net Utility Plant	\$145,393,712	\$42,527,007	(\$33,836,830)	\$154,083,889

^{*}The 2022 depreciation amounts for the Broadband and General Plant categories have been adjusted by \$23,442 respectively to correct the Broadband generator asset depreciation that was misclassified into General Plant in 2022.

The District has active construction projects as of December 31, 2023 in the amount of \$7,571,879. A portion of these projects will be reimbursed by 2024 bond funds. Refer to Note 16 - Subsequent Events, 2024 Bond Issue.

NOTE 4 – NOTES RECEIVABLE

In 2013, the District established a receivable with BPA relating to prepayment of power - refer to Note 9. In 2023, the District established a repayment agreement with Noanet to provide financing for Noanet's unfunded pension liability - refer to Note 11.

During the year ended December 31, 2023, the following changes occurred in notes receivable:

Notes Receivable, Current Portion	2022	Increases	Decreases	2023
BPA Receivable - Current Portion	600,000	600,000	(600,000)	600,000
NoaNet Receivable- Current Portion	0	54,845		54,845
Total Other Current Notes Receivable	\$600,000	\$654,845	(\$600,000)	\$654,845

Notes Receivable, Non Current Portion	2022	Increases	Decreases	2023
BPA Receivable - Long Term	2,850,000		(600,000)	2,250,000
NoaNet Receivable- Long Term	0	700,000	(54,845)	645,155
Total Other Non Current Notes Receivable	\$2,850,000	\$700,000	(\$654,845)	\$2,895,155

During the year ended December 31, 2022, the following changes occurred in notes receivable:

Notes Receivable, Current Portion	2021	Increases	Decreases	2022
BPA Receivable - Current Portion	600,000	600,000	(600,000)	600,000
Total Other Current Notes Receivable	\$600,000	\$600,000	(\$600,000)	\$600,000

Notes Receivable, Non Current Portion	2021	Increases	Decreases	2022
BPA Receivable - Long Term	3,450,000		(600,000)	2,850,000
Total Other Non Current Notes Receivable	\$3,450,000	\$0	(\$600,000)	\$2,850,000

NOTE 5 - LONG TERM DEBT

During the year ended December 31, 2023, the following changes occurred in long term debt:

Series	Final Maturity	Original Issue Amount	Balance, 12/31/22	Increases	Decreases	Balance, 12/31/23	Amounts Due Within One Year
2013B - interest rates ranging 1.0% - 4.2%	2038	\$9,155,000	\$7,785,000		(\$330,000)	\$7,455,000	340,000
2016 A - interest rates ranging 3.1% - 5.0%	2041	16,870,000	16,815,000		(1,125,000)	15,690,000	1,180,000
2020 A Electric Revenue Bonds - interest rate 4.0%	2045	6,055,000	6,055,000			6,055,000	
2020B - interest rates ranging .6% - 2.9%	2041	32,135,000	32,135,000		(1,295,000)	30,840,000	1,305,000
Subtotal			62,790,000		(2,750,000)	60,040,000	2,825,000
Plus: Unamortized premium			2,090,673		(300,357)	1,790,316	
Less: Unamortized discount			(23,130)		1,390	(21,740)	
Total Long Term Debt			\$64,857,543		(\$3,048,967)	\$61,808,576	\$2,825,000

During the year ended December 31, 2022, the following changes occurred in long term debt:

Series	Final Maturity	Original Issue Amount	Balance, 12/31/21	Increases	Decreases	Balance, 12/31/22	Amounts Due Within One Year
2013B - interest rates ranging 1.0% - 4.2%	2038	\$9,155,000	\$7,785,000			\$7,785,000	330,000
2016 A - interest rates ranging 3.1% - 5.0%	2041	16,870,000	16,870,000		(55,000)	16,815,000	1,125,000
2016B - interest rates ranging 1.0% - 2.2%	2022	15,305,000	1,880,000		(1,880,000)		
2020 A Electric Revenue Bonds - interest rate 4.0%	2045	6,055,000	6,055,000			6,055,000	
2020B - interest rates ranging .6% - 2.9%	2041	32,135,000	32,135,000			32,135,000	1,295,000
Subtotal			64,725,000		(1,935,000)	62,790,000	2,750,000
Plus: Unamortized premium			2,403,612		(312,939)	2,090,673	
Less: Unamortized discount			(24,520)	i.	1,390	(23,130)	
Total Long Term Debt			\$67,104,092		(\$2,246,549)	\$64,857,543	\$2,750,000

Future Debt Service on bonds outstanding as of December 31, 2023 is as follows:

Year	Principal	Interest	Total
2024	2,825,000	2,041,663	4,866,663
2025	2,915,000	1,954,363	4,869,363
2026	3,000,000	1,861,687	4,861,687
2027	3,105,000	1,761,659	4,866,659
2028	3,215,000	1,654,466	4,869,466
2029-2033	17,195,000	6,472,897	23,667,897
2034-2038	17,300,000	3,686,501	20,986,501
2039-2043	7,525,000	1,387,281	8,912,281
2044-2045	2,960,000	178,800	3,138,800
Total	\$ 60,040,000	\$ 20,999,317	\$ 81,039,317

During 2013 the District issued Series 2013A Electric Revenue and Refunding bonds in the amount of \$18,370,000 and Series 2013B (taxable) in the amount of \$9,155,000 for the purpose of financing certain capital improvements to the District's electric system and refund the 2001, 2002 and 2003 outstanding bonds, as well as certain maturities of the 2007 bonds. The refunding portion of the bond proceeds was placed in an irrevocable trust for future debt service on the refunded bonds. At December 31, 2013, the 2001, 2002 and 2003 bonds were considered defeased and are no longer reflected in the District's financial statements. The refunding resulted in net present value cash flow savings of (\$1,071,453) and an economic loss from refunding of \$770,025. Bond proceeds were also used to establish the debt service reserve fund in the amount of \$3,142,483 as required by the bond resolutions.

In October 2016, the District issued Electric Revenue and Refunding Bonds Series 2016A and 2016B (taxable) in the amounts of \$16,870,000 and \$15,305,000, respectively. The bonds were issued for the purpose of refunding the portion of the 2007 series bonds maturing after September 1. 2017 and to fund future improvement to the electric utility system in the amount of \$5 million. The refunding proceeds were placed in an irrevocable trust for future debt service on the refunded bonds and as of December 31, 2016 are no longer reported within the District's Financial Statements. The transaction resulted in a net present value cash flow savings to the District of \$2.4 million over the life of the refunded bonds and an economic gain of \$257,938. The refunding resulted in an increase to the District's Debt Service Reserve Fund of \$772.166.

In December 2020 the District issued series 2020A Electric Revenue and Refunding bonds in the amount of \$6,055,000 and Series 2020B (taxable) in the amount of \$32,135,000. Series 2020B included \$10 million new proceeds as well as \$22,135,000 to advance refund the outstanding balance of 2013A Tax Exempt bonds as well as portions of the 2021 and 2022 maturities of the Series 2016B Bonds. New bond proceeds were issued for the purpose of financing certain capital improvements.

Refunding proceeds were placed in an irrevocable trust for future debt service on the refunded bonds. Accordingly, those bonds are no longer considered outstanding and are not reported within the District's financial statements. The bond resolution did not require a debt service reserve for these bond issues. This resulted in a release of the District's Debt Service Reserve fund of \$1,514,153 which was designated for future debt service payments.

The District calculates the amount required to be held in the Debt Service Reserve fund in accordance with bond resolutions for the outstanding bonds secured by the fund on an annual basis. Any amount released from the fund reimburses unrestricted funds for amounts contributed to bond sinking funds throughout the year. As of December 31, 2023 and 2022 a balance of \$2,163,204 and \$2,221,493 was held in the Debt Service Reserve Fund, respectively.

There are a number of other limitations and restrictions contained in the various bond resolutions. The District is in compliance with all significant limitations and restrictions, including those regarding federal arbitrage.

NOTE 6 - OTHER CREDITS AND LIABILITIES

Changes in Other Credits and Liabilities as of December 31, 2023 were as follows:

Other Credits & Liabilities - Current	2022	Increases	Decreases	2023
Compensated Absences – Current	583,421	1,500,160	(1,446,459)	737,122

NOTE 7 - PENSION PLANS

The following table represents the aggregate pension amounts for all state sponsored pension plans for the years 2023 and 2022:

Aggregate Pension Amounts - All Plants	2023	2022
Pension liabilities	\$1,259,543	\$1,522,492
Pension assets	\$2,918,673	\$2,629,378
Deferred outflows of resources	\$2,361,059	\$2,747,331
Deferred inflows of resources	\$1,629,969	\$2,773,230
Pension expense (income)	(\$377,256)	(\$396,537)

STATE SPONSORED PENSION PLANS

Substantially all of the District's full-time and qualifying part-time employees participate in one of the following statewide retirement systems administered by the Washington State Department of Retirement Systems, under cost-sharing, multiple-employer public employee defined benefit and defined contribution retirement plans. The state Legislature establishes, and amends, laws pertaining to the creation and administration of all public retirement systems.

The Department of Retirement Systems (DRS), a department within the primary government of the State of Washington, issues a publicly available Annual Comprehensive Financial Report (ACFR) that includes financial statements and required supplementary information for each plan.

The DRS ACFR may be downloaded from the DRS website at www.drs.wa.gov.

PUBLIC EMPLOYEES RETIREMENT SYSTEM (PERS)

PERS members include elected officials; state employees; employees of local governments; and higher education employees not participating in higher education retirement programs. PERS is comprised of three separate pension plans for membership purposes: Plan 1, Plan 2/3 and Plan 3. Plan 1 accounts for the defined benefits of Plan 1 members. Plan 2/3 accounts for the defined benefits of Plan 2 members and the defined benefit portion of benefits for Plan 3 members. Plan 3 accounts for the defined contribution portion of benefits for Plan 3 members. Although employees can be a member of only Plan 2 or Plan 3, the defined benefits of Plan 2 and Plan 3 are accounted for in the same pension trust fund. All assets of Plan 2/3 may legally be used to pay the defined benefits of any Plan 2 or Plan 3 members or beneficiaries.

PERS Plan 1 provides retirement, disability, and death benefits. Retirement benefits are determined as two percent of the member's average final compensation (AFC) times the member's years of service. The AFC is the average of the member's 24 highest consecutive service months. Members are eligible for retirement from active status at any age with at least 30 years of service, at age 55 with at least 25 years of service, or at age 60 with at least five years of service. PERS Plan 1 retirement benefits are actuarially reduced if a survivor benefit is chosen. Members retiring from active status prior to the age of 65 may also receive actuarially reduced benefits. Other benefits include an optional cost-of-living adjustment (COLA). PERS 1 members were vested after the completion of five years of eligible service. The plan was closed to new entrants on September 30, 1977.

Contributions

The PERS Plan 1 member contribution rate is established by State statute at 6 percent. The employer contribution rate is developed by the Office of the State Actuary, adopted by the Pension Funding Council and is subject to change by the legislature

The PERS Plan 1 required contribution rates (expressed as a percentage of covered payroll) for 2023 were as follows:

PERS Plan 1		
Actual Contribution Rates:	Employer	Employee
January - June 2023	2.5	
PERS Plan 1	6.36%	6.0%
PERS Plan 1 UAAL	3.85%	
Administrative Fee	0.18%	
Total	10.39%	6.0%
July - August 2023		
PERS Plan 1	6.36%	6.0%
PERS Plan 1 UAAL	2.85%	
Administrative Fee	0.18%	
Total	9.39%	6.0%
September - December 2023		
PERS Plan 1	6.36%	6.0%
PERS Plan 1 UAAL	2.97%	
Administrative Fee	0.20%	
Total	9.53%	6.0%

The PERS Plan 1 required contribution rates (expressed as a percentage of covered payroll) for 2022 were as follows:

Actual Contribution Rates:	Employer	Employee
January - August 2022		
PERS Plan 1	6.36%	6.0%
PERS Plan 1 UAAL	3.71%	
Administrative Fee	0.18%	
Total	10.25%	6.0%
September - December 2022		
PERS Plan 1	6.36%	6.0%
PERS Plan 1 UAAL	3.85%	
Administrative Fee	0.18%	
Total	10.39%	6.0%

PERS Plan 2/3 provides retirement, disability, and death benefits. Retirement benefits are determined as 2% of the member's AFC times the member's years of service for Plan 2 and 1% of AFC for Plan 3. The AFC is the average of the member's 60 highest-paid consecutive service months. Members are eligible for retirement with a full benefit at 65 with at least five years of service credit. Retirement before age 65 is considered an early retirement. PERS Plan 2/3 members who have at least 20 years of service credit and are 55 years of age or older, are eligible for early retirement with a benefit that is reduced by a factor that varies according to age for each year before age 65. PERS Plan 2/3 retirement benefits are actuarially reduced if a survivor benefit is chosen. Other PERS Plan 2/3 benefits include a COLA based on the CPI, capped at 3% annually. PERS 2 members are vested after completing five years of eligible service. Plan 3 members are vested in the defined benefit portion of their plan after ten years of service; or after five years of service if 12 months of that service are earned after age 44.

PERS Plan 3 defined contribution benefits are totally dependent on employee contributions and investment earnings on those contributions. Members are eligible to withdraw their defined contributions upon separation. Members have multiple withdrawal options, including purchase of an annuity. PERS Plan 3 members are immediately vested in the defined contribution portion of their plan.

Contributions

The **PERS Plan 2/3** employer and employee contribution rates are developed by the Office of the State Actuary to fully fund Plan 2 and the defined benefit portion of Plan 3. The rates are adopted by the Pension Funding Council, and are subject to change by the Legislature. The employer rate includes a component to address the PERS Plan 1 Unfunded Actuarial Accrued Liability (UAAL).

As established by Chapter 41.34 RCW, Plan 3 defined contribution rates are set at a minimum of 5% and a maximum of 15%. PERS Plan 3 members choose their contribution rate from six options when joining membership and can change rates only when changing employers. Employers do not contribute to the defined contribution benefits.

The PERS Plan 2/3 defined benefit required contribution rates (expressed as a percentage of covered payroll) for 2023 were as follows:

PERS Plan 2/3	Employer	Employee
Actual Contribution Rates:	2/3	2
January - June 2023		
PERS Plan 2/3	6.36%	6.36%
PERS Plan 1 UAAL	3.85%	
Administrative Fee	0.18%	
Employee PERS Plan 3		Varies
Total	10.39%	6.36%
July - August 2023		
PERS Plan 2/3	6.36%	6.36%
PERS Plan 1 UAAL	2.85%	
Administrative Fee	0.18%	
Employee PERS Plan 3		Varies
Total	9.39%	6.0%
September - December 2023		
PERS Plan 2/3	6.36%	6.36%
PERS Plan 1 UAAL	2.97%	
Administrative Fee	0.20%	
Employee PERS Plan 3		Varies
Total	9.53%	6.36%

The District's actual PERS plan contributions were \$324,726 to PERS Plan 1 and \$607,253 to PERS Plan 2/3 for the year ended December 31, 2023

The PERS Plan 2/3 required contribution rates (expressed as a percentage of covered payroll) for 2022 were as follows:

PERS Plan 2/3 Actual Contribution Rates:	Employer 2/3	Employee 2
January - August 2022		_
PERS Plan 2/3	6.36%	6.36%
PERS Plan 1 UAAL	3.71%	
Administrative Fee	0.18%	
Employee PERS Plan 3		Varies
Total	10.25%	6.36%
September - December 2022		
PERS Plan 2/3	6.36%	6.36%
PERS Plan 1 UAAL	3.85%	
Administrative Fee	0.18%	
Employee PERS Plan 3		Varies
Total	10.39%	6.36%

The District's actual PERS plan contributions were \$371,742 to PERS Plan 1 and \$630,110 to PERS Plan 2/3 for the year ended December 31, 2022.

ACTUARIAL ASSUMPTIONS AS OF JUNE 30, 2023

The total pension liability (TPL) for each of the DRS plans was determined using the most recent actuarial valuation completed in 2023 with a valuation date of June 30, 2022. The actuarial assumptions used in the valuation were based on the results of the Office of the State Actuary's (OSA) 2013-2018 Demographic Experience Study and the 2021 Economic Experience Study.

Additional assumptions for subsequent events and law changes are current as of the 2022 actuarial valuation report. The TPL was calculated as of the valuation date and rolled forward to the measurement date of June 30, 2023. Plan liabilities were rolled forward from June 30, 2022, to June 30, 2023, reflecting each plan's normal cost (using the entry-age cost method), assumed interest and actual benefit payments.

- Inflation: 2.75% total economic inflation; 3.25% salary inflation
- **Salary increases:** In addition to the base 3.25% salary inflation assumption, salaries are also expected to grow by service-based salary increase.
- Investment rate of return: 7.00%

Mortality rates were developed using the Society of Actuaries' Pub. H-2010 mortality rates, which vary by member status (e.g. active, retiree, or survivor), as the base table. OSA applied age offsets for each system, as appropriate, to better tailor the mortality rates to the demographics of each plan. OSA applied the long-term MP-2017 generational improvement scale, also developed by the Society of Actuaries, to project mortality rates for every year after the 2010 base table. Mortality rates are applied on a generational basis; meaning, each member is assumed to receive additional mortality improvements in each future year throughout their lifetime.

Methods did not change from the prior contribution rate setting June 30, 2021 Actuarial Valuation Report (AVR).

ACTUARIAL ASSUMPTIONS AS OF JUNE 30, 2022

The total pension liability (TPL) for each of the DRS plans was determined using the most recent actuarial valuation completed in 2022 with a valuation date of June 30, 2021. The actuarial assumptions used in the valuation were based on the results of the OSA's 2013-2018 Experience Study and the 2021 Economic Experience Study.

Additional assumptions for subsequent events and law changes are current as of the 2021 actuarial valuation report. The TPL was calculated as of the valuation date and rolled forward to the measurement date of June 30, 2022. Plan liabilities were rolled forward from June 30, 2021, to June 30, 2022, reflecting each plan's normal cost (using the entry-age cost method), assumed interest and actual benefit payments.

- Inflation: 2.75% total economic inflation; 3.25% salary inflation
- Salary increases: In addition to the base 3.25% salary inflation assumption, salaries are also expected to grow by promotions and longevity.
- Investment rate of return: 7.00%

Mortality rates were developed using the Society of Actuaries' Pub. H-2010 mortality rates, which vary by member status (e.g. active, retiree, or survivor), as the base table. OSA applied age offsets for each system, as appropriate, to better tailor the mortality rates to the demographics of each plan. OSA applied the long-term MP-2017 generational improvement scale, also developed by the Society of Actuaries, to project mortality rates for every year after the 2010 base table. Mortality rates are applied on a generational basis; meaning, each member is assumed to receive additional mortality improvements in each future year throughout their lifetime.

Methods did not change from the prior contribution rate setting June 30, 2019 Actuarial Valuation Report (AVR), however OSA introduced a temporary method change to produce asset and liability measures for the June 30, 2020 AVR. There were also the following assumption changes:

- OSA updated the Joint-and-Survivor Factors and Early Retirement Factors in the model. Those factors are used to value benefits for early retirement and survivors of members that are deceased prior to retirement. These factors match the administrative factors provided to DRS for future implementation that reflect current demographic and economic assumptions.
- OSA updated the economic assumptions based on the 2021 action of the PFC and the LEOFF Plan 2 Retirement Board. The investment return assumption was reduced from 7.5% (7.4% for LEOFF 2) to 7.0%, and the salary growth assumption was lowered from 3.5% to 3.25%. This action is a result of recommendations from OSA's biennial economic experience study.

DISCOUNT RATE

The discount rate used to measure the total pension liability for all DRS plans as of was 7.0% as of June 30, 2023 and 2022.

To determine that rate, an asset sufficiency test was completed to test whether each pension plan's fiduciary net position was sufficient to make all projected future benefit payments for current plan members. Based on OSA's assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return of 7.0% was used to determine the total liability as of June 30, 2023 and 2022.

LONG-TERM EXPECTED RATE OF RETURN

The long-term expected rate of return on the DRS pension plan investments of 7.0% (as of June 30, 2023) and 7.0% (as of June 30, 2022) was determined using a building-block-method. In selecting this assumption, the OSA reviewed the historical experience data, considered the historical conditions that produced past annual investment returns, and considered Capital Market Assumptions (CMA's) and simulated expected investment returns provided by the Washington State Investment Board (WSIB). The WSIB uses the CMA's and their target asset allocation to simulate future investment returns at various future times.

ESTIMATED RATES OF RETURN BY ASSET CLASS

The table below summarizes the best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2023. The inflation component used to create the table is 2.2% and represents the WSIB's most recent long-term estimate of broad economic inflation.

Asset Class	Target Allocation	% Long-Term Expected Real Rate of Return Arithmetic
Fixed Income	20%	1.50%
Tangible Assets	7%	4.70%
Real Estate	18%	5.40%
Global Equity	32%	5.90%
Private Equity	23%	8.90%
	100%	

Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2022, are summarized in the table below. The inflation component used to create the table is 2.2% and represents the WSIB's most recent long-term estimate of broad economic inflation.

Asset Class	Target Allocation	% Long-Term Expected Real Rate of Return Arithmetic
Fixed Income	20%	1.50%
Tangible Assets	7%	4.70%
Real Estate	18%	5.40%
Global Equity	32%	5.90%
Private Equity	23%	8.90%
	100%	

SENSITIVITY OF THE NET PENSION LIABILITY/(ASSET)

The table below presents the District's 2023 proportionate share of the net pension liability (asset) calculated using the discount rate of 7.0%, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower (6.0%) or 1-percentage point higher (8.0%) than the current rate.

	1% Decrease (6.00%)	Current Rate 7.00%	1% Increase (8.00%)
PERS 1 (.055177%)	\$1,760	\$1,259,543	\$823,044
PERS 2/3 (.071210%)	\$3,174,406	(\$2,918,673)	(\$7,924,251)

The table below presents the District's 2022 proportionate share of the net pension liability calculated using the discount rate of 7.0%, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower (6.0%) or 1-percentage point higher (8.0%) than the current rate.

	1% Decrease (6.00%)	Current Rate 7.00%	1% Increase (8.00%)
PERS 1 (.054680%)	\$2,034,028	\$1,522,492	\$1,076,041
PERS 2/3 (.070896%)	\$3,096,436	(\$2,629,378)	(\$7,333,495)

PENSION PLAN FIDUCIARY NET POSTION

Detailed information about the State's pension plans' fiduciary net position is available in the separately issued DRS financial report.

PENSION LIABILITIES (ASSETS), PENSION EXPENSE, AND DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES RELATED TO PENSIONS

At June 30, 2023, the District reported a total pension liability (asset) of \$1,259,543 and (\$2,918,673) for its proportionate share of the net pension liabilities as follows:

	Liability (or Asset)
PERS 1	\$1,259,543
PERS 2/3	(\$2,918,673)

At June 30, 2022, the District reported a total pension liability (asset) of \$1,522,492 and (\$2,629,378) for its proportionate share of the net pension liabilities as follows:

	Liability (or Asset)
PERS 1	\$1,522,492
PERS 2/3	(\$2,629,378)

At June 30, the District's proportionate share of the collective net pension liabilities was as follows:

	Proportionate Share 6/30/22	Proportionate Share 6/30/23	Change in Proportion
PERS 1	0.054680%	0.055177%	0.000497%
PERS 2/3	0.070896%	0.071210%	0.000314%
	Proportionate Share	Proportionate Share	Change in
	6/30/21	6/30/22	Proportion
PERS 1	0.063695%	0.054680%	-0.009015%
PERS 2/3	0.079301%	0.070896%	-0.008405%

Employer contribution transmittals received and processed by the DRS for the fiscal year ended June 30 are used as the basis for determining each employer's proportionate share of the collective pension amounts reported by the DRS in the *Schedules of Employer and Nonemployer Allocations* for all plans except LEOFF 1.

PENSION EXPENSE

For the year ended December 31, 2023 and 2022, the District recognized pension expense as follows:

TOTAL	(\$377,256)	(\$396,537)	
PERS 2/3	(380,060)	(878,147)	
PERS 1	\$2,804	\$481,610	
1	2023	2022	

DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES

At December 31, 2023, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

PERS 1	Deferred Outflows of Resources	Deferred Inflows of Resources

FRANKLIN PUD 401(a) QUALIFIED PLAN AND 457 DEFERRED COMPENSATION PLAN

The District sponsors and serves as trustee for single-employer defined contribution plans for the purpose of providing retirement income to employees. The plans were established pursuant to Internal Revenue Code (IRC) sections 457(b) and 401(a) and are administered by MissionSquare Retirement. The District's employer-appointed Deferred Compensation Committee (DCC) operates and oversees the plans in accordance with the Committee's Operating Guidelines.

PLAN DESCRIPTION

The plan assets are held in trust for the exclusive benefit of the plan participants and their beneficiaries. Plan participants include permanent District employees, retirees, and those who have separated but have elected to keep assets in the plan. The District's Commission may alter, amend or terminate the plans. There are no forfeitures of member assets.

Employees may select one of three plan options upon accepting employment with the District, which direct the employer contributions for deposit to either the 401(a) or the 457(b) plan. Employees who have not made a plan election are automatically enrolled to receive employer contributions into the 401(a) plan. The 401(a) plan had 123 and 126 participants as of December 31, 2023 and 2022, respectively. The 457(b) plan had 130 and 134 participants as of December 31, 2023 and 2022, respectively.

CONTRIBUTIONS

Employees may contribute to the plans up to the pretax compensation limit as defined in the plan documents. Employees eligible to participate in the plans are regular, permanent employees of the District. The District contributes 3% of regular employee wages to the plan for each eligible employee. The District made contributions of \$291,996 and \$260,929 in 2023 and 2022, respectively. Employees made contributions of \$528,728 and \$518,312 to the 457 and 401(a) Plans in 2023 and 2022, respectively.

NOTE 8 - HEALTH BENEFIT PLANS

HRA/VEBA

The District makes a monthly \$50 contribution on behalf of each regular, full-time employee into a Health Reimbursement Agreement (HRA) account. Employees who elect to participate in a District provided wellness program receive a \$150 per month contribution into their account. In addition, the District makes annual contributions to employee HRA accounts for those employees who enroll in the District's consumer directed health plan (CDHP). The plan assets are held in trust for the exclusive benefit of plan participants and beneficiaries. The plan is administered by HRA VEBA Trust.

PAID FAMILY MEDICAL LEAVE ACT SELF INSURANCE

The District makes a monthly \$50 contribution on behalf of each regular, full-time employee into a Health Reimbursement Agreement (HRA) account. Employees who elect to participate in a District provided wellness program receive a \$150 per month contribution into their account. In addition, the District makes annual contributions to employee HRA accounts for those employees who enroll in the District's consumer directed health plan (CDHP). The plan assets are held in trust for the exclusive benefit of plan participants and beneficiaries. The plan is administered by HRA VEBA Trust.

The District paid \$210,775 and \$111,741 in claims during 2023 and 2022, respectively. District employees pay no premium for this benefit.

NOTE 9 - POWER SUPPLY

BONNEVILLE POWER ADMINISTRATION (BPA)

The District obtains power from BPA under a long-term power purchase agreement. BPA supplies the District's power under a Block and Slice Power Sale Agreement, which extends from October 1, 2011 through September 30, 2028. The Block product provides power in monthly amounts ranging between 50 average megawatts (aMW) to 81 aMW. Monthly Block purchase amounts are fixed, but are shaped to the District's monthly power requirements. The Slice product provides the District 0.78% of the output of the federal system.

The District's share of the Slice product is expected to be 75 aMW, but may vary considerably based on water conditions within the Northwest. Depending upon hydroelectric generating conditions and market prices, the District expects to procure between 90% and 95% of its total energy resources from BPA on an average annual basis.

Beginning October 1, 2011, BPA changed its rate-making methodology to a tiered rate approach. Each preference customer received a High Water Mark (HWM) based on its 2010 load that defined its right to buy power at a Tier 1 rate. The Tier 1 rate is based on the cost of the existing federal system. HWMs are translated into "Tier 1 Cost Allocators" (TOCAs) which, when multiplied by the estimated costs of the federal system, determine their power costs. There is an additional monthly load shaping charge (or credit) for Block and Load Following products, determined by the shape of customers' loads when compared to the shape of the federal system.

If a preference customer wants to buy more BPA power beyond their HWM, it will be sold by BPA at a Tier 2 rate set to fully recover BPA's cost to serve the additional power. Preference customers also have the option of serving some, or all, of their above-HWM load with non-federal resources. At this time the District has no plans to buy Tier 2 power from BPA.

BPA is required by federal law to recover all of its costs through the rates that it charges its customers. The rate provisions for the Block product include a cost recovery adjustment clause (CRAC). The CRAC allows BPA to raise rates to collect sufficient funds to pay costs. A dividend distribution clause (DDC) results in dollars being returned to customers, in the form of future power rate decrease, if excess dollars are collected.

BPA's Reserves Distribution Clause (RDC), a mechanism that implements an element of BPA's Financial Reserves Policy triggered by BPA's results for the fiscal year, returned excess financial reserves to BPA customers beginning in December 2022 and continuing through September 2023. The RDC was implemented again for BPA's 2023 fiscal year to be distributed to customers from December 2023 through September 2024. The District received a total of \$3,870,722 in RDC offsetting Power Supply expense incurred during 2023.

Pursuant to the Slice product rate provisions, the District is subject to additional charges or credits from BPA if BPA's actual costs deviate from budgeted amounts. The Slice product is not subject to the CRAC or DDC; but rather, the District pays its share of cost increases or receives its share of cost decreases through an annual true-up mechanism.

The District's share of the true-up was approximately (\$818,967) and (\$302,529) in 2023 and 2022, respectively

Beginning in April 2013, the District receives a monthly \$50,000 credit on its power bill for participation in the BPA Prepay Program. This program allowed customers to purchase blocks of prepaid credits for the future delivery of power in order to help BPA fund improvements to its infrastructure. The District purchased one block of prepay credits in the amount of \$6.8 million for the period April 2013 through September 2028. Total monthly credits received by the District will be \$9.3 million, and will result in a net present value savings of approximately \$1.1 million.

The District also entered into a contract with BPA for transmission service effective May 31, 1997, which provides point-to-point transmission capacity to help meet the District's annual system peak load. The transmission contract extends through September 30, 2031.

FREDERICKSON PROJECT

The District had an agreement with Frederickson Power, L.P. for the purchase of 30 MW of contract capacity from the Frederickson combined-cycle natural gas-fired combustion turbine project station near Tacoma, Washington. The agreement expired September 1, 2022. The District was able to economically dispatch the plant each day based on spot market power and gas prices. Power costs included a capacity charge and fixed and variable operation and maintenance charges indexed to performance and escalation factors. The District was responsible for supplying natural gas to Frederickson Power, L.P. at Huntingdon, British Columbia on days that the plant was generating power. Natural gas was supplied to the Frederickson Project via the Northwest Pipeline. A proportionate share of the cost of this transportation was passed-through to the District each month. This resource was replaced by a power supply contract with Powerex beginning in January 2023.

POWEREX CONTRACT

The District commenced a Power Supply contract with Powerex Corp. ("Powerex"), a wholly owned subsidiary of BC Hydro, effective January 1, 2023 through December 31, 2028. This contract supplies the District with 40 MW July through September, and 25 MW for the remaining months each calendar year. The contract consists of a fixed monthly per kilowatt price component and an hourly index-based price component for MWh of energy delivered.

ENERGY NORTHWEST

Energy Northwest is a municipal corporation and a joint operating agency of the State of Washington. It has the authority to acquire, construct and operate works, plants, and facilities for the generation and transmission of electric power and energy. The membership of Energy Northwest consists of twenty-three public utility districts, including the District, and five cities, all located in the State of Washington. The District is a participant in Nuclear Project Nos. 1 and 3, Columbia Generating Station, the Packwood Lake Hydroelectric Project and the Nine Canyon Wind Project. Columbia Generating Station, the Packwood Lake Hydroelectric Project and the Nine Canyon Wind Project are operating; Nuclear Project Nos. 1 and 3 have been terminated.

The District, Energy Northwest and BPA have entered into separate "net billing agreements" with respect to Energy Northwest's Project No. 1, Columbia Generating Station and 70% ownership share of Project No. 3. Under terms of these agreements, the District has purchased from Energy Northwest and, in turn, assigned to BPA a maximum of capability of each project. BPA is unconditionally obligated to pay the District and the District is unconditionally obligated to pay Energy Northwest, the pro rata share of the total annual costs of each project, whether or not the projects are completed, operable or operating and notwithstanding the suspension, reduction or curtailment of the projects' output. The District's respective shares may be increased by not more than 25% upon default of other public agency participants.

Packwood Lake Hydroelectric Project

The District is a 10.5% participant in Energy Northwest's 27 MW Packwood Project (the Project), located in the Cascade Mountains south of Mount Rainier. The Project, having satisfied all of the requirements for relicensing with the Federal Energy Regulatory Commission, was issued a new forty-year license on October 1, 2018. Energy Northwest recognizes revenues equal to expenses for each period. No net revenue or loss is recognized, and no equity is accumulated. Accordingly, no investment for the joint venture is reflected on the District's statement of net position. The participants entered into new Power Sales Contracts with Energy Northwest effective October 1, 2011. The participants' Agreements obligate the 12 participants to pay annual costs and receive excess revenues. The District uses their share of the energy, approximately 1 aMW, to serve customer load.

Nine Canyon Wind Project

The Nine Canyon Wind Project is another Energy Northwest generation project. It is located in the Horse Heaven Hills area southwest of Kennewick. The District has a contract for 2.01 MW of Phase I capacity and 8 MW of Phase III capacity. Nine Canyon has a capacity factor of 29% and the District receives approximately 2.88 aMW.

WHITE CREEK WIND PROJECT

The District entered into a 20-year Purchase Agreement with LL&P Wind Energy, Inc., a wholly-owned subsidiary of Lakeview Light and Power. The District purchases all of the energy and associated environmental attributes produced from 10 MW of the White Creek Wind Project's (White Creek) capacity. White Creek has a capacity factor of 30% and the District receives approximately 3 aMW. During the first contract year (2008) the price of energy delivered to the District was \$51.97 per MWH; the price increases by 2% annually during the term of the contract. The environmental attributes included in that price includes any and all credits, benefits, emissions reductions, offset and allowances attributable to the White Creek as a renewable energy resource.

ESQUATZEL HYDROELECTRIC PROJECT

The District contracted with Green Energy Today, LLC in 2011 to acquire the output from a small conduit hydroelectric project in Pasco, Washington, known as the Esquatzel Project. The Esquatzel Project generates approximately .5 aMW of electricity annually from return water flowing out of an agricultural canal that drains into the Columbia River. Water is diverted from the canal into a penstock and through a turbine with a generating capacity of 1 MW. The Esquatzel Project generally generates electricity year-round. The District's agreement with Green Energy Today, LLC is for a 20-year term, with a first right of refusal for two additional 10-year periods

CONSERVATION / ENERGY SERVICES

Conservation funding is available from BPA under the Energy Efficiency Incentive (EEI) program in two year blocks. The District also budgets annually for self-funded conservation projects. Under EEI, utilities request reimbursement from BPA after conservation dollars have been spent on eligible projects. EEI funds rebate incentives for residential energy efficiency upgrades including: weatherization upgrades and Energy Star appliances. The EEI Funds also provide incentives for industrial, irrigation and commercial accounts for cost-effective energy savings.

LEGISLATIVE IMPACTS

ENERGY INDEPENDANCE ACT (I-937)

The citizens of Washington State passed Initiative 937 in November 2006, now codified in the Revised Code of Washington Chapter 19.285 as the Energy Independence Act (the Act), which mandates renewable energy and conservation targets for the State's utilities with more than 25,000 customers. As of December 31, 2016 the District crossed this customer threshold. The Esquatzel, Nine Canyon and White Creek contracts will provide some of the renewable energy the District will need to comply with the Act's targets in the future.

CLEAN ENERGY TRANSFORMATION ACT (CETA)

In 2019, the Washington State Legislature passed the Clean Energy Transformation Act (CETA) which sets specific milestones for The State to achieve a 100% carbon neutral energy supply by 2030 and a 100% carbon free energy supply by 2045. CETA is codified in the Revised Code of Washington chapter 19.405 and applies to all electric utilities serving retail customers. BPA's resource mix is approximately 85% carbon free hydropower. The District is currently managing towards meeting the additional 15% required by CETA to achieve carbon neutrality by 2030. This will be achieved through a combination of resources, such as additional hydro, wind, and solar power coupled with purchased Renewable Energy Credits (RECs).

WASHINGTON CAP AND TRADE / CLIMATE COMMITTMENT ACT (CCA)

In 2021, the Washington Legislature adopted a package of legislative and budget proposals to establish a comprehensive, market-based program to reduce carbon pollution from both in-state electricity generation and electricity imports coming into the state beginning January 1, 2023. The capand-invest program sets a limit, or cap, on overall carbon emissions in the state and requires businesses to obtain allowances equal to their covered greenhouse gas emissions. These allowances can be obtained through quarterly auctions hosted by Ecology or bought and sold on a secondary market. Given the District's fuel mix of non-carbon energy the District was awarded no-cost Carbon Allowances. In 2023 the District received \$1,890,900 in proceeds from the sale of these no-cost Carbon Allowances as permitted by Washington State's Climate Commitment Act (CCA), a state run cap-and-invest program.

NOTE 10 - RISK MANAGEMENT

The District maintains the following insurance coverage:

Coverage	Limit
Buildings and Personal Property	\$142,344,539
General Liability	2,000,000
Auto Liability	2,000,000
Cyber Liability	1,000,000
Crime/Faithful Performance	4,000,000
Umbrella Liability	15,000,000
Electromagnetic Field Liability	500,000
Directors, Officers & Mgrs. Liability	10,000,000
E&O Technology	3,000,000
Employee Theft Liability	2,000,000
Forgery or Alteration	2,000,000
Computer & Funds Transfer Fraud	2,000,000
Money Orders & Counterfeit Money	2,000,000

The District has not paid insurance settlements in excess of coverage in any of the past three years.

NOTE 11 – PARTICIPATION IN NORTHWEST OPEN ACCESS NETWORK, INC. d.b.a. NOANET

The District, along with eight other Washington State Public Utility Districts and Energy Northwest, is a member of NoaNet, a Washington nonprofit mutual corporation. NoaNet was incorporated in February 2000 to provide a broadband communications backbone, over Public Benefit Fibers leased from BPA, throughout Washington. The network began commercial operation in January 2001.

NoaNet recorded an increase in net position (unaudited) of \$8,066,256 and a decrease of \$2,842,242 for 2023 and 2022, respectively.

NOANET FINANCIAL GUARANTEE

In December 2020, current Members of NoaNet entered into a Repayment Agreement to guarantee the 10-year, \$24,775,000 Telecommunications Network Revenue Bonds (2020 Bonds) issued by NoaNet to finance capital improvements and other expenses, repay loans and a line of credit, fund a reserve account, and pay bond issuance costs. The 2020 Bonds will become due beginning in December 2021 through December 2030 with interest due semi-annually at rates ranging from 0.591 percent to 2.120 percent.

The 2020 Bonds were issued and guaranteed pursuant to RCW chapters 24.06 and 39.34 and Title 54. Under the Repayment Agreement, each guarantor acknowledged and agreed that it is a guarantor of the payment of the principal and interest on the 2020 Bonds and was liable

by assessment or otherwise to repay NoaNet for amounts due and owing with respect to such principal and interest up to each Member's agreed upon percentage interest. The District's guarantee was 10 percent of the outstanding Bonds.

To the extent NoaNet's gross revenue is insufficient to pay principal and interest amounts when due, NoaNet shall bill each guarantor no less than 65 days in advance of each principal and interest payment date for its percentage share. Each guarantor has 30 days to pay after receipt of the bill. In event of a failure by any guarantor to pay such amounts when due, the guarantor shall be subject to all remedies as contained in NoaNet's bylaws. Each guarantor shall remain obligated to pay its respective share of principal and interest on the 2020 Bonds, when due, whether or not it remains a member of NoaNet. The District's outstanding guarantee is \$1,772,500 and \$2,013,500 as of December 2023 and 2022 respectively.

NOANET FINANCING

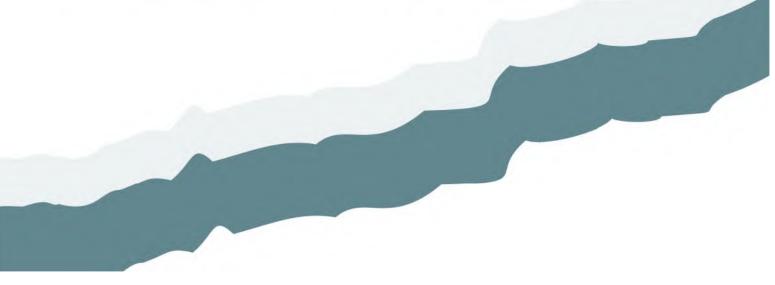

On April 4, 2023 the District executed a repayment agreement with NoaNet to provide \$700,000 of financing towards NoaNet's \$10.4 million unfunded pension liability. NoaNet will repay the amount over 10 years beginning May 1, 2024 with final payment due May 1, 2034. The financing accrues interest at a variable rate based on the average Washington LGIP 30-day yield for the previous 12 month period. The current and noncurrent portions due to the District as a result of this agreement are presented within the Statement of Net Position as notes receivable – refer to Note 4.

The District reports no investment or liability account balance reflecting NoaNet membership.

NoaNet's Annual Report may be obtained by writing to: Northwest Open Access Network, Chief Financial Officer, 11707 E Sprague Ave, Ste 201, Spokane Valley, WA 99206.

NOTE 12– TELECOMMUNICATIONS SERVICES

The District installed and continues to build out a fiber optic backbone system in its service area to provide wholesale telecommunication services and for internal use by the electric system. The District has connected its fiber optic system to Noanet's fiber optic communications system. Broadband coverage is also being extended through the development of a wireless network to deliver high-speed Internet service.

The following is a summary of Broadband activities for 2023 and 2022:

Broadband	2023	2022 as restated
Operating Revenues:		
Drop Fees	\$231,891	\$121,015
Fiber Transport charges	1,320,335	1,254,797
Dark Fiber	473,426	420,675
WiFi Transport	600	600
Collocation Rental	246,151	276,437
Miscellaneous Broadband Services	217,384	164,128
Total Operating Revenues	\$2,489,787	\$2,237,652
Operating Expenses:		
Labor and Benefits	349,661	329,693
Supplies	13,755	2,183
Professional Services	87,882	81,888
Other Charges	159,301	141,550
Hardware and Fiber Maintenance	163,904	92,663
Administration and General	194,392	162,240
Taxes	11,825	10,807
Depreciation	1,194,824	902,065
Total Operating Expenses	\$2,175,544	\$1,723,089
Capital Contributions	\$26,275	\$1,467
Capital Investment:		
Current	1,173,057	1,385,863
Cumulative (since 2000)	\$26,215,704	\$25,042,647

NOTE 13 – SPECIAL ITEM

In 2022, the District returned \$290,266 in unspent Federal Grant Funds to the Washington State Department of Commerce in conjunction with the Residential Utility Arrearage Grant Funding. Refer to Note 15 - Grant Awards.

NOTE 14 – COVID-19 PANDEMIC

In February 2020, the Governor of the state of Washington declared a state of emergency in response to the spread of the deadly new virus known as COVID-19. In the months following the declaration, precautionary measures to slow the spread of the virus were ordered. These measures included closing schools, cancelling public events, limiting public and private gatherings, and restricting business operations, travel and non-essential activities.

The District took measures to limit the spread of the virus including adopting remote-work for certain employees, closure of public spaces, and increased sanitation measures. The District re-opened to the public in March 2021, with most safety measures remaining in place. The emergency proclamation for the State of Washington was lifted on October 28, 2022.

NOTE 15 – GRANT AWARDS

FEDERAL EMERGENCY MANAGEMENT ACT (FEMA)

In February 2021, a federal disaster was declared for a wildfire that took place in September 2020. This fire destroyed certain electric distribution assets owned by the District. The District has applied for and received approval for public assistance through the Washington State Department of Military and Federal Emergency Management Agency (FEMA) to partially reimburse the cost of labor, material, contract labor and other expenses incurred to restore power and rebuild/replace the assets lost. Recovery from the disaster includes the undertaking of projects designed to prevent similar disasters in the future. Funding for the projects was provided 75% by FEMA, 12.5% by Washington State Department to the Military Emergency Management Division, and 12.5% by the District. The District recorded Federal and State Grant Revenue in the amount of \$291,292 related to FEMA projects in 2021. Of this amount, \$9,995 was received in 2021 with the remainder paid in January 2022. In April 2022 the federal cost share was changed from 75% to 90%, resulting in \$5,957 of additional cost reimbursement to the District. The funds received were reported as Federal Grant Revenue.

RESIDENTIAL UTILITY ARREARAGE GRANT (UAGP)

In November 2022 the District was awarded of \$341,345 as a subrecipient of the State and Local Fiscal Recovery Funds (SLFRF) provided by the US Department of Treasury and administered by the Washington State Department of Commerce – Energy Division. The purpose of the grant was to provide funding for public and private water, sewer, garbage, electric, and natural gas utilities to address low-income customer arrearages compounded by the COVID-19 pandemic and the related economic downturn that were accrued between March 1, 2020, and December 31, 2021. The District awarded a total of \$51,079 to qualifying customers based on the criteria set forth in the grant agreement. The District returned unspent grant funds on December 30, 2022.

Additional funds in the amount of \$79,502 were awarded to The District in 2023 and were passed through to our customers. These funds were recorded as Federal Grant Expense within the Statement of Revenues, Expenses and Changes in Net Position. Refer to Note 13 - Special Item.

AMERICAN RESCUE PLAN ACT (ARPA) CAPITAL GRANT AWARD

In May 2023 the District was awarded \$4.9 million in grant funding through the State Broadband Office to construct Fiber to the Home (FTTH) in Connell and Basin City. The project will bring affordable and reliable high-speed internet service to these areas which have historically been unserved or underserved. This project was started in late 2023 and capital expenses of \$22,091 were incurred.

NOTE 16 – SUBSEQUENT EVENTS

2024 BOND ISSUE

In April 2024 the district issued series 2024 Electric Revenue bonds in the amount of \$18.6 million. New bond proceeds were issued for the purpose of financing certain capital improvements.

2024 RATE INCREASE

The District's Board of Commissioners at its April 23, 2024 regular meeting approved an overall increase to electric rate revenue of 3% effective annually from May 1, 2024 - May 1, 2027.

ABOUT THE STATE AUDITOR'S OFFICE

The State Auditor's Office is established in the Washington State Constitution and is part of the executive branch of state government. The State Auditor is elected by the people of Washington and serves four-year terms.

We work with state agencies, local governments and the public to achieve our vision of increasing trust in government by helping governments work better and deliver higher value.

In fulfilling our mission to provide citizens with independent and transparent examinations of how state and local governments use public funds, we hold ourselves to those same standards by continually improving our audit quality and operational efficiency, and by developing highly engaged and committed employees.

As an agency, the State Auditor's Office has the independence necessary to objectively perform audits, attestation engagements and investigations. Our work is designed to comply with professional standards as well as to satisfy the requirements of federal, state and local laws. The Office also has an extensive quality control program and undergoes regular external peer review to ensure our work meets the highest possible standards of accuracy, objectivity and clarity.

Our audits look at financial information and compliance with federal, state and local laws for all local governments, including schools, and all state agencies, including institutions of higher education. In addition, we conduct performance audits and cybersecurity audits of state agencies and local governments, as well as state whistleblower, fraud and citizen hotline investigations.

The results of our work are available to everyone through the more than 2,000 reports we publish each year on our website, www.sao.wa.gov. Additionally, we share regular news and other information via an email subscription service and social media channels.

We take our role as partners in accountability seriously. The Office provides training and technical assistance to governments both directly and through partnerships with other governmental support organizations.
